The DHS Program is proud to announce the availability of model datasets. No registration necessary!
http://dhsprogram.com/data/Model-Datasets.cfm

Model datasets contain full datasets, final report tables & sampling errors. Like other The DHS Program datasets, data files are available in flat (ASCII), Stata, SPSS, & SAS formats. Users simply pick and choose which files to download and then have instant access.

Model datasets can be used in a wide variety of ways:
~Practice replicating final report tables~
~Try calculating complex indicators~
~Teach statistical concepts and procedures~
Let us know how you are using model datasets by replying to this thread or emailing:
modeldatasets@dhsprogram.com

Model datasets are based on the DHS Phase 6 Questionnaire and Recode. They have been created strictly for practice and do not represent any country's data.
