Dear DHS Program,

Is there any variable that may indicate "birth order" for each birth from women who gave birth in the last 5 years ("v208>0", Indonesia DHS 2012). I understand that, for example, "m3a_1" indicates whether the assistance during delivery from the latest birth is doctor; and "m15_1" indicates place of delivery of the latest birth. Which variable may indicate that this latest birth is the woman's 1st/2nd/3rd/.. birth?

Thank you.
