Dear User,

There is a variable called BORD - Birth order number gives the order in which the children were born and so is the reverse order from BIDX. This and other useful information regarding the variables is contained in our Standard Recode Manual which can be downloaded from our website and by clicking on this link <http://www.dhsprogram.com/publications/publication-dhsg4-dhs-questi-onnaires-and-manuals.cfm> also

The Guide to DHS Statistics contains a wealth of information <http://www.dhsprogram.com/publications/publication-dhsg1-dhs-questi-onnaires-and-manuals.cfm>

If you have additional questions, please feel free to post again. Thank you!
