dear Luke,
thank you so much for your share. i'm working with DHS Indonesia 2012 and having trouble with your syntax in SPSS
when i run it, there will be an error command like this
>Error # 4792 in column 11. Text: PESO
>The name of the weighting variable is undefined. Either the variable has not
>been defined or its name has been misspelled.
>Execution of this command stops.

can you tell me what's wrong with this? thanks before
