Following is a response from Senior DHS Data Processing Specialist, Ladys Ortiz:

The Dominican Republic Special DHS (DR6A) is actually the sugar cane plantation survey (also known as: Bateyes). It's a very small sample and is not representative by region. The sample was based on the sugar cane plantations in DR. The value labels are ok and have the same meaning as in DR61. For more information, please reference the Bateyes' final report (table 1.1 sample design).
