---

clear all

\*Renaming Household's unique variable\*

```
use "C:\Users\...\PKPR61FL.DTA"  
gen v001=hv001  
gen v002=hv002  
label variable v001 "Cluster number_copy"  
recast long v001  
format %12.0g v001  
label variable v002 "Household number_copy"  
recast int v002  
format %8.0g v002
```

```
sort v001 v002  
save "C:\Users\...\PKPR61FL_A.DTA"
```

\*Merging Women's file with Household's file\*

```
use "C:\Users\...\PKIR61FL.DTA", clear  
sort v001 v002  
merge m:m v001 v002 using "C:\Users\...\PKPR61FL_A.DTA"
```

\* For checking merging has done correctly \*

```
* v138=eligible women in women's questionnaire & hv010=eligible women in household's  
questionnaire*  
tab v138 hv010
```
