Dear All,

I am doing my PhD research on children's health outcomes and women's empowerment in Kyrgyz Republic. I am using KgDHS 2012 KR data set.

May you please, suggest me a reference resource (DHS docs) where it is explicitly stated that in KR a respondent under v003 and a biological mother of the child is the same person. How can I prove that?

Thank you for your support and care
with much appreciation
Erkingul
