Dear Trevor,

Thank you so much for your reply. However, Ethiopia DHS 2011 has no calendar information (Vcal\_1), neither it has variable of pregnancy outcome (Live born/ Born dead/ lost before pregnancy). EDHS 2000 IR data file has no variable such as pregnancy history. I used the code you gave me but it did not work with EDHS 2000 IR data file. In this situation, how can i calculate stillbirth using EDHS 2011 IR data file.

Yours sincerely

Sammy
