Dear User,

There was an error in the earlier posting. Here is the proper coding:
Referring to S218 when it should be S228

```
If S216 = 1 or S217 = 1 then Live birth
elseif S216 = 2           then stillbirth
elseif S228 =1           then abortion
elseif S228 <> 1         then miscarriage
```
