Following is a response from Senior DHS Stata Specialist, Tom Pullum:

It is clear from "tab v133 v149" that there was a coding error in the construction of v133. I believe the other grouping of levels of education, v106, is correct.

You could correct v149 with these two lines:

```
replace v149=1 if v133==6
```

```
replace v149=2 if v133==8
```

I will notify the Data Processing staff. Thanks for catching this!
