In the household questionnaire, Q137, an item should be added to the list of possible responses "No Specific place for hand-washing... 5".

In households where there is no specific place for hand washing, a simple question can be asked: "Do members of your household usually wash their hands with soap or detergent?"

List of responses: Yes, No

For all households, the following question should be added right after Q139:

"When or at occasions members of your household usually wash their hands with soap/detergent?"

List of possible responses :

Before eating

After defecation

After cleaning a child after defecation

Other

Don't usually wash hands with soap
