Dear DHS Team,

I would be very grateful if you could clarify the strata used in the Uzbekistan 2002 survey. Though the report states that stratification was employed, the strata are not defined. Can one assume that there are 9 strata created by combining the region (5 region) and type of place of residence (urban/rural) areas?

Thank you.

Following is a response from DHS Senior Sampling Specialist, Mahmoud Elkasabi:

Yes, this is correct. There were 9 strata in the 2002 UDHS formed by region by urban/rural. Such information are detailed in Table A.2 in the final report.
