Hi,

I have requested GPS data for a few countries. I have still not received access to the datasets. I read it should have been available within 2 business days, but it has been 5 days today. I could use some help on timeline of when I would receive it. Thanks!

AK

Hi AK,

According to my records, your request from 16 April was approved on 19 April. If you log into your account, you should have access to the dataset

best,

--Tom

Thanks for the clarification, I just got the email saying it was confirmed (I only had gotten one country approval email before this). I don't know why it did not show up when I checked right before I submitted this query. Anyway, I got it now, thanks!
