Hello,  
I am looking for the variable "Self-reported exposure to seasonal malaria chemoprevention (SMC)" for children from 03 -59 months in Togo.  
The result of the coverage rate exists in the general report of the survey but I can't find the variable in the different databases of the survey. Thank you for helping me!

With thanks,  
Kombate

Following is a response from DHS Lead Malaria Research Analyst, Cameron Taylor:

The variables you are looking for are s403b s403c s403d s403e s403f s403g in the 2017 Togo MIS KR data file (TGKR71FL)

These variables align with the questions in the questionnaire (Q403B-Q403G) which ask about SMC.
