Hello,

You can use our standardized code available at <https://github.com/DHSProgram> for this table. Specifically you would need the code in the CM\_PMR.do file if you are using Stata: [https://github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap08\\_CM](https://github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap08_CM)

The same file is also available in SPSS:

[https://github.com/DHSProgram/DHS-Indicators-SPSS/tree/master/Chap08\\_CM](https://github.com/DHSProgram/DHS-Indicators-SPSS/tree/master/Chap08_CM)

As well as R: [https://github.com/DHSProgram/DHS-Indicators-R/blob/main/Chap08\\_CM/CM\\_PMR.R](https://github.com/DHSProgram/DHS-Indicators-R/blob/main/Chap08_CM/CM_PMR.R)

Please read the readme file on the main site before running any of this code.

Thank you.

Best,

Shireen Assaf

The DHS Program
