I found no observations in v384d (BDHS 2017-18, IR data file). But in BDHS 2017-18 report, it is showing 0.8% had received FP messages through mobile phones.

Which variable/s should I use for this information?

Thanks.

Following is a response from Senior Data Processing Specialist, Hanna Useem:

We used the variable S815F to calculate the results in the table.
