Subject: Create a daughters' file on Stata
Posted by Louthb on Sat, 22 Jan 2022 16:27:41 GMT

Hello,

I am stating with Stata and DHS's use.
I want to have the number of girls aged 0 to 14 who have been circumcised in Guinea for all the available surveys.
I know you can have this information with the base IR but I don't know how to do this with Stata.

Many thanks in advance

Following is a response from DHS Senior Analysis & Research Manager, Shireen Assaf:

Stata code for this is on the DHS GitHub site. Please carefully read all the notes in the do files, including the main file. https://github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap18_FG
