I am using the Tanzania women's database (IR) and I don't find observations for women's religion and other variables such as "can refuse sex" and "can ask partner to use a condom". So I want to confirm that these variables are not available in this survey.

Following is response from DHS Research & Data Analysis Director, Tom Pullum:
You are correct, those variables were not included in this survey. Decisions about which questions to include are made by advisors in the country, not by DHS staff.
