Hi! I was wondering whether there's a survey manual for the anthropometrics part, i.e. when recording height, weight and arm circumference. If so, where can I find it?

Thank you!

Following is a response from DHS Lead Nutrition Research Associate, Rukundo Benedict:

The biomarker manual that includes anthropometry training on height and weight measurements is on the web here: [https:// dhsprogram.com/publications/publication-DHSM7-DHS-Questionnaires-and-Manuals.cfm](https://dhsprogram.com/publications/publication-DHSM7-DHS-Questionnaires-and-Manuals.cfm). We do not routinely collect mid-upper arm circumference in DHS surveys.
