Hi all,
I am currently working with DHS data for India waves 2005-2015-2019.
I would like to get information about the precise caste the individuals belong to.
At the moment, I noticed that DHS 2005 has the information in a separate file, but I was wondering if it is possible to get the same type of information also for the most recent waves (2015 and 2019). Should I get specific approval to get this information?

Thank you for your time
