Greetings!

I am study dhs data mayanmer of 2015-16 data file.now I have to generate two variables women decision making power and pysical violence.

Please help to generate these variables.

Can anyone suggest me the code of these two variable?

Following is a response from DHS Research & Data Analysis Director, Tom Pullum:

The Stata code for these indicators and other indicators in the DV chapter are included in the programs on this GitHub page:

[https:// github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap17\\_DV](https://github.com/DHSProgram/DHS-Indicators-Stata/tree/master/Chap17_DV).

If you want to run the code for chapter 17, please first read the documentation on how to set up your data. Otherwise, you can just go into the do files and extract the constructions you are looking for.
