---

Good day

Kindly assist with identifying the recode file with data on the consumption of fruits and vegetables among women for 2013 Namibia DHS. I have searched the Person Recode and Individual Recode files, but both do not have these variables. I realized this information was in a separate file for South Africa's 2016 DHS. There is another recode file named AH (adult health), but I cannot find the same file for Namibia.

Please help!

Kind Regards

Lesley
