Can you please assist me with the STATA code used to create the wealth index (including the quintiles) in the DHS reports?
I would tremendously appreciate this!

Many thanks.

I have seen from the DHS site the SPSS syntax is provided:
https://dhsprogram.com/topics/wealth-index/Wealth-Index-Cons truction.cfm. But can any please assist with the STATA code?

Following is a response from DHS Research & Data Analysis Director, Tom Pullum:

The logic behind the continuous wealth index and the wealth quintiles is described in the Guide to DHS Statistics (https://www.dhsprogram.com/Data/Guide-to-DHS-Statistics/index.cfm).

For specific surveys and Stata code, we have links on the website (https://www.dhsprogram.com/topics/wealth-index/Wealth-Index-Construc tion.cfm).
