Dear Dr Tom, and the other DHS experts,

I would kindly like to call for help in replicating the PNC timing for the mother for the 2000 and 2005 EDHS.

Specifically, though I attempted to get the same results as in the pdfs using standard codes (prepared by the DHS),

I cannot replicate Tables 10.9 of the 2000 EDHS and 9.7 of the 2005 EDHS, both on mothers' timing for their PNC.

As always, I would like to thank you for your help.

Regards,

---

Thank you for submitting your question. Please refer to the link below for finding your indicator of interest.

DHS code library on GitHub, choose the Stata, SPSS, or R repository according to the software you use: <https://github.com/DHSProgram/>

The indicator you are interested in is in chapter 9.

If still needing assistance, please let us know.
