How to compute antenatal care ?
Which file we need to use?
How to match with India facts-sheet result?
Which variable is needed for calculation?
Please share stata command.

Following is a response from Senior DHS staff member, Tom Pullum:

This indicator has already been calculated for the report and for the fact sheets, as you say. The DHS website has many links to help you become familiar with the data. I recommend starting with the Data tab (<https://www.dhsprogram.com/Data/>). The online Guide to DHS Statistics (<https://www.dhsprogram.com/Data/Guide-to-DHS-Statistics/index.cfm>) and programs (<https://github.com/DHSProgram>) should be helpful.
