Dear all, I am a new user of this database and for my analysis, I am using the KR file. So, I want to use the mother's BMI as one covariate I want to use along with others. But, I don't know where I missed it, I couldn't get the variable or the covariates "mother BMI" or Is that computed from other variables?. Anyone, please help me with the "mother BMI" from The KR file? my activity is stacked do this variable missing

Thank you for submitting your question. Could you please provide some more detailed information so we can better advise you?

Can you let us know:

- Which survey you are using (Include country name and year)?
- Which data files you are referring to?
- Which software you are using (Stata, SPSS, R, etc.)?

If you are trying to match a Table in a final report, please also indicate which table and which estimate you are trying to match.
