Dear All,

I am using the 2016 Ethiopian GPS data with the 2016 DHS. Given that I am trying to map the country Ethiopia and its Regions based on the shapefile I received from DHS based on our project. So even If I try to plot in R, I couldn't find the map e of the country and its regions. even if I try to map it in Geoda and QGIs, I get the same solution, which means the map is not correctly plotted. I understand that I missed one pivot point to map it correctly. So, anyone,I can't thank you enough if anyone could give me the solution to it. For reference, I have attached the following sample plot about it. I AM LOOKING FORWARD TO YOUR VALUABLE SUPPORT!!
