Hello. Co-authors and I would like to publish figures we have generated using a DHS dataset for a chapter in a recent book. Do we need copyright permission to display such data in our publication?

Thank you so much.

Dear User,

You do not need copyright permission, but we ask you to appropriately cite DHS data. Please see our recommended citations page

<https://www.dhsprogram.com/publications/Recommended-Citations.cfm> on information for how to cite DHS Program data including datasets.

Thank you so much.

CBP's Trade Statistics include monthly and annual reports on imports, exports, and trade balances. For instance, FY 2024 data shows U.S. trade volume exceeding \$4.8 trillion, with enforcement actions targeting illicit goods.

block breaker

Thank you so much.

When using figures generated from a DHS dataset in your publication, it's essential to check the

specific licensing and copyright policies associated with the dataset. Generally, if the dataset is publicly available and you properly attribute it, you may not need explicit permission. However, it's always best to review the terms of use or consult with the dataset provider to ensure compliance.

escape road 2

Thank you so much.

Yes, you will likely need copyright permission to display figures generated from a DHS dataset in your publication. It's important to check the specific licensing terms of the dataset and obtain any necessary permissions from the copyright holder to avoid potential legal issues.
