Are these variables being collected in the 2017 or 2022 data:

-physical/emotional abuse by husband/partner

We downloaded the DHS file which contains no data or NA. Is there no data at all for the variable physical/emotional abuse by husband/partner?

Following is a response from DHS staff member, Tom Pullum:

The final reports on both of these surveys include a Chapter 15 on violence against women. The IR files include the usual d* variables from the domestic violence module. Please let us know if you still cannot find these variables.
