Hi,

I am trying to replicate results for the column "All basic vaccinations" in the Table 10.2 Vaccinations by source of information in KDHS 2014 report using the attached do file.

Any guidance is appreciated!

Best,

Stephen.

Following is a response from Senior DHS staff member, Tom Pullum:

The reply to this post is very late but we exchanged emails directly. The attached Stata program will match the first 3 rows of Table 10.2 except for polio, which had a survey-specific adjustment that I am unable to replicate.
