In reference to The Pakistan Demographic Health Survey Report 2012-2013, Table 10.3
Vaccinations by background characteristics, how could one replicate this in SPSS?

We will review your post, and someone will be back to you soonest.

Thanks

What was your syntax for the columns that had all vaccinations, no vaccinations and number of children?

I have managed to replicate the table. No need for syntax

Thanks for letting us know that you figured it out. However, I am posting the syntax provided by our Senior Data Processing Specialist, Ladys Ortiz. Another data user might find it helpful:

```

*// Number of children.
*// Only for living children age 12-23 months .
COMPUTE months = V008 - B3.
SELECT IF (B5 = 1 & Months >= 12 & Months <= 23).

*// Type of vaccines.
*// BCG.
IF (H2 >= 1 & H2 <= 3) BCG = 1.

* DPT 1.
*// Initializing working variable to accumulate DPT 1,2,3.
COMPUTE DPT = 0.
IF (H3 >= 1 & H3 <= 3) DPT = DPT + 1.
IF (H5 >= 1 & H5 <= 3) DPT = DPT + 1.
IF (H7 >= 1 & H7 <= 3) DPT = DPT + 1.
IF ( DPT >= 1) DPT1 = 1.
IF ( DPT >= 2) DPT2 = 1.
IF ( DPT >= 3) DPT3 = 1.

* POLIO 0.
IF (H0 >= 1 & H0 <= 3) Polio0 = 1.

* POLIO 1.
*// Initializing working variable to accumulate Polio 1,2,3.
COMPUTE Polio = 0.
IF (H4 >= 1 & H4 <= 3) Polio = Polio + 1.
IF (H6 >= 1 & H6 <= 3) Polio = Polio + 1.
IF (H8 >= 1 & H8 <= 3) Polio = Polio + 1.
*// Defining each POLIO variables depending of accumulative number .
IF (Polio >= 1) Polio1 = 1.
IF (Polio >= 2) Polio2 = 1.
IF (Polio >= 3) Polio3 = 1.

* Measles.
IF (H9 >= 1 & H9 <= 3) Measles = 1.

*// Count all basics vaccinations received at any time.
COUNT AllBasic = BCG DPT1 DPT2 DPT3 Polio1 Polio2 Polio3 measles (1).
IF ( Allbasic = 8) AllVac = 1.
VARIABLE LABELS AllVac "".
VALUE LABELS AllVac 1"All basic vaccinations2".

*// Count No basics vaccinations given at any time.
*// No vaccines = none of the basic vaccines & no polio 0.
COMPUTE vP0 = 0.
IF (H0 >= 1 & H0 <= 3) vP0 = 1.

```

IF (AllBasic = 0 & vP0 = 0) NoVac = 1.
VARIABLE LABELS NoVac "".
VALUE LABELS NoVac 1"No vaccinations".

Are there any variables in the dataset that could measure mother's mental health?

This information is not normally collected in our surveys. There is at least one survey with questions on Mental Health - Uzbekistan 2002 Special (Ref page 316 - Appendix E of the Final Country Report). If I come across any others, I will add that to this post.

The attached file (provided by DHS Specialist, Liz Britton), gives a few more surveys with questions on mental health.

I hope that helps.

Dear Bridgette-DHS

Thank you very much for your valuable answers always.

can you provide me the same syntax in SAS for PDHS 2012-13 for vaccination as you provided to msg no 2608?

Regards.

Unfortunately, we do not have that syntax in SAS.
