Hi,

I would like to ask for the SPSS syntax used to identify breastfeeding duration in the 2017 DHS in Indonesia, including any breastfeeding, exclusive breastfeeding, and Predominant breastfeeding (Table 11.3). Please help me,

Thank you so much,

Following is a response from DHS staff member, Tom Pullum:

Generic SPSS programs for the indicators are given on our GitHub site (<https://github.com/DHSProgram/DHS-Indicators-SPSS>). Breastfeeding is in Chap11_NT. If that doesn't match the report, please let us know and I may be able to provide the code that was used specifically for this survey, but it will be CPro, not SPSS, and you will have to translate it into SPSS.
