Hi All,

Greetings.

Did anyone able to access all the past data in the DHS recently? I see new registration cannot be done because of temporary pause.
Is there any way to access the old waves of these surveys?

Best,
Fahad

I see that too and it seems like there are rules for registration. Someone should let everyone know.

If you already had an account before the pause, you should still be able to log in and access past datasets; otherwise, you might try reaching out directly to the DHS Program team to request temporary access or updates on when registration will reopen.

Cricfy App has been a game-changer for keeping up with live scores and highlights. The download process was smooth, and it runs well on my phone. Great option for cricket fans on the go!

To access DHS data, register at, castle app providing your affiliation and research purpose. After approval, log in, select a country and survey, request specific datasets, and download them in formats like Stata or SPSS. Data is free for research or educational use with agreement to terms.
