Hi,

Good day everyone. I will like to have specific variables of malaria control and treatment practices at individual and community level factors in the Nigeria Malaria Indicator Survey (MIS) 2010.

Thanking you in anticipation.

Amyostic

Amyostic,

Look at the Word document and FRQ file (you can open this in Notepad) that come with the zip file of the MIS data you downloaded from the DHS website (e.g., ngir61dt.zip). The variable names and corresponding questions are all there.

RHS
