Hello,

When I map the clusters for the 2007 Liberia DHS, there is a cluster that sits far outside of
Liberia's administrative boundaries. I believe it is cluster 298. Could you provide the correct
coordinates for this point?

The data for cluster 298 is marked as missing and has a latitude and longitude of 0,0; this can be
seen in the attribute data for the shapefile. This information is also available in the READ ME files
contained in the downloaded zip folder.
