Dear Sir or Madam,

we would like to know whether the data for Colombia is available on the regional level?
We want to evaluate the data over time and would therefore also need to know for what waves it is available?

In particular, we are interested in

- Birth Registration
- Child Discipline
- Domestic Violence
- Early Childhood Education
- HIV Behavior
- HIV Knowledge
- Micronutrients
- Migration
- Women's Status

Thank you in advance.

Please refer to the Spatial Data Repository Boundaries page for more information on the regional representation of different survey years in Columbia.
The link is: <http://spatialdata.dhsprogram.com/boundaries/#view=table& ;countryId=CO>

If the regions do not match the 2005 and 2010 survey are representative at 33 administrative areas, but surveys prior to that have a different configuration.
You may be able to use the GPS data location of surveyed clusters to match to previous survey regions.
The GPS data can be downloaded with permission from the main survey site.
