I do not understand how the variable V137 (Number of children resident in the household and aged 5 and under; Respondent's Basic Data) can be labeled as '0', when data show that one child (or sometimes two children) are actually living in the household. Can someone help me? Thanks

Dear User,
There is an existing thread you may want to visit regarding an explanation of this variable. Please look through those messages and if you still have questions, please post again. Here is the link to the existing thread: http://userforum.dhsprogram.com/index.php?t=msg&th=1348&goto=2381&S=08b96f10db822f1f280ececb9fbc791a#msg_238 1
