Hello All,

I am noting significant differences between the Zonal Fact Sheets and Stat Compiler data.

For example- the Zonal Fact sheet for South West Nigeria

<http://dhsprogram.com/pubs/pdf/OF23/OF23.pdf>- notes that the modern contraceptive prevalence rate for South West Nigeria is 38%. The Stat compiler data notes 24.9% for the South West.

This is true for all states.

Any wisdom?

Thanks!

Never mind- zonal fact sheets report any contraceptives vs. modern contraceptives- will go back to the reports to get modern contraceptive rates by states.
