Subject: Problems accessing the SAS HR for Nigeria

Hello!
When I tried to open the household data for the 2008 Nigeria DHS in SAS I got the following error code:
 YZR malfunction: file HH2008.NGHR53FL.DATA trashed or YZR code bug
I have never seen this error term before. When I try to open the data in SAS Enterprise, I get all of the variable names, but no data.
Does anyone have any wisdom?
Thanks,
Anne

The nghr53fl.sd2 file has been replaced with a new copy.
