Dear colleagues I am analyzing the effect of fertility on the health of mothers and children in Tanzania and I want to use the under five child mortality the neonatal mortality as indicators of child health outcomes. Could anyone help me on how to get the indicators for the under five and neonatal child mortality in the DHS?

Dear User,

You may find the post by one of our experts useful. http://userforum.dhsprogram.com/index.php?t=msg&th=1589&got_o=3394&S=2ca167d5bc9d36d4eb19d44567d7ea30#msg_3394. You may also want to refer to The Guide to DHS Statistics for some guidance. <http://www.dhsprogram.com/publications/publication-dhsg1-dhs-questi> onnaires-and-manuals.cfm Statistics: neonatal Mortality Rate, Post-neonatal Mortality Rate, Infant Mortality Rate, Child Mortality Rate (Ages 14) and Under-five Mortality Rate Page 92 in The Guide to DHS Statistics. After reviewing these resources, if you still need assistance, please feel free to post again.

Thank you!
