I want to fit Cox model on a neonatal data set created from birth recode file of PDHS data. Can any one help me for estimating neonatal survival time in days from DHS data?

Dear User,

You may find some guidance by looking at the Guide to DHS Statistics.

http://www.measuredhs.com/pubs/pdf/DHSG1/Guide_to_DHS_Statistics_29Oct2012_DHSG1.pdf. The publication is bookmarked. The tab for "Infant and Child Mortality" should be of some help to you.
