I am currently trying to use some TB related questions in the 2008 Nigeria DHS datasets but I cannot find questionnaire no.1004A as a variable in the women's(IR) dataset. This question and others like 1002A-C are in the questionnaire at the end of the report.
Am I using the wrong dataset or these questions were not asked of the respondents?

I have found it under the S-variables while I had been searching under the general V474 TB variables. Thanks
