Hello,
I am working on DHS data set of Nepal of 1996, 2001, 2006 and 2011. My work needs to analyze on specific districts and villages of all these mentioned years. I could only get the Districts information in year 2006 survey. Could you please advice me on the procedure I could be able to retrieve District and Village information of Nepal of all these above mentioned years' surveys?
Thank you.

Please refer to message thread #122 within the Geographic Data section which explains why District labels are not included in the recode files, and gives information about how to use the GPS data to reclassify cluster locations for your analysis:
