Using the KR data file:

Is the denominator for exclusive breastfeeding:

a. all of the children <6 mo

OR

b. last born children <6 mo (bidx=1)

Are the variables used for tabulating exclusive breastfeeding:

v404 = currently breastfeeding yes/no

v409 to v413d = determine liquid intake

v414a to v414w = determine food intake

Should age be calculated using:

v008 = CMC months for survey date

b3 = CMC months for child birthdate

Dear User,

We are working on a response for you. Once we have something ready to post, we will do so.
Thank you!

Hello

I find this book, it has different syntaxes for breastfeeding

I hope you enjoy it
