Subject: About the Data extraction Posted by ss11 on Mon, 15 Jun 2015 07:04:10 GMT View Forum Message <> Reply to Message

Hello,

I am trying to analyze the Determinants of Diarrhea in under five children. Do I need to extract the data file or can I use Child recode file? I am having a problem in getting sample size of under five children in regards with illness?

Dear User, Here is a response from one of our data processing experts, Ladys Ortiz: Quote:Please use the KR file. The unit of analysis is the child. Thank you!
