Apologies in advance if this is a stupid question, but I was wondering if you had anything to help guide the grouping of occupations into the categories that you have in the survey:

Professional/technical/managerial

Clerical

Sales and services

Skilled manual

Unskilled manual

Domestic service

Agriculture

Specifically, the ones I have questions about are "sales and services", and the difference between "skilled" and "unskilled" manual and where Professional/technical comes in. Just wondering if you have any quick guidance that you might give your data collectors or your data entry folks to guide them in this. I have things like "hairedresser" and "tailor" and I'm not sure where to put them.

Thanks for your help. I'd be lost without this forum!

Emily

Dear User,

One of our experts, Mr. Trevor Croft, suggested you take a look at the International Standard Classification of Occupation (ISCO) Codes

<http://www.ilo.org/public/english/bureau/stat/isco/isco08/>, which we prefer to use if possible. We use the 2 digit codes where possible. These pages provide details of the coding of each occupation into the two digit codes.

Thank you for your post.
