Dear GIS training participants,

This is your forum to ask each other and DHS staff questions about QGIS and mapping for your data.

First, though we have a questions for you. In your evaluations many of you said you wished that the training had been more participatory.

What did you mean by this please give us concrete examples?

We already have lots of time for questions, individual work, and hands on QGIS exercises. What else can we do?

Thanks,

Clara

Hey,

I feel the training was more practical oriented and it would be great to have more trainers (min 3) for such a number of trainees.

thanks
