Dear User,
Can you please post the code you have tried already? Maybe someone can offer some guidance
after seeing that. Can you please also specify which survey and year you are working with? In the
meantime, you can also look at The Guide to DHS Statistics
[http://www.dhsprogram.com/publications/publication-dhsg1-dhs
-questionnaires-and-manuals.cfm](http://www.dhsprogram.com/publications/publication-dhsg1-dhs-questionnaires-and-manuals.cfm) for possible guidance on working with DHS data.
Thank you!

Dear User,
Here is a response from one of our data processing experts, Mr. Nouredine Abderrahim,
Quote:In table 9.5 of the Pakistan DHS 2012-13, the places of delivery (M15) 20 to 29 are coded
public sector and the places 30 to 39 are coded private sector for the first part of the table. For
the second part, codes 10 to 19 of the place of delivery are considered home, 40 to 48 are
considered other and questions asked for which the answer is missing are coded missing. Note
that not all the codes within the range are used (such as code 13).
Thank you for your post. If you have additional questions, please feel free to post again.
