Subject: Help with Unique Identifier Kenya 2010 SPA

 I am using the Kenya SPA 2010 dataset and am trying to link the modules. I can't seem to find a unique identifier for providers or clients. I am trying to link client-provider observations to individual providers and then to their respective facilities. Does anyone have any experience with this or have any suggestions?

Dear User,
While I am not an expert on SPA data, you may find the Word files distributed with the data to be of some use to you in using the data. I am attaching them for your convenience. You should also have these if you downloaded the data. The Readme.doc is general use for all SPA data sets. The KESP6B.doc is specific to the Kenya SPA 2010 data set.
