Hi,

What is the general timeline for releasing the Bangladesh and Tanzania SPA datasets? Just a rough timeline is sufficient, e.g. Q1 2016.

Thanks  
Emily

Dear Emily,  
We estimate Dec 2015 for Bangladesh and January 2016 for Tanzania SPA. Thank you for you post.

Thank you for this information,

AS a follow up question, will Bangladesh and Tanzania SPA contain a limited re-examination of the sick child in the exit interview - similar to Malawi SPA (e.g. take temperature, count breathing rates)

Thanks again  
Emily

Dear Emily,  
I checked with two of our staff members associated with those surveys and they both said "no". Bangladesh 2014 BHFS does not include observation of sick child or exit interview of caretaker. If you have additional questions, please feel free to post again.  
Thank you!

To clarify, was the re-exam conducted in the new Tanzania survey? The data don't appear to be in the dataset, but the survey document does include the same re-exam questions as Malawi.

Thanks,  
Anna

Dear User,

A response from SPA specialist, Dr. Paul Ametepi:

Quote:

I want to believe the user is referring to the Sick Child re-examination as an optional module in the sick child exit interview questionnaire. The 2014-15 Tanzania SPA did not use the child re-examination module. It does not appear in the questionnaires published as part of the report.

Can you please elaborate on the discrepancy?

Thank you!
